 portfolio |  Anweshha-Bali |  Anweshha |  bali1408@mylaurier.ca |  226-972-2171 | Waterloo, ON

EDUCATION

Wilfrid Laurier University + University of Waterloo

September 2022 – Present

Bachelor of Business Administration + Bachelor of Computer Science, Co-op Program

Waterloo, Ontario

- **Board of Directors @UWMEF; Undergraduate Representative @SCS; Researcher @WiM**
- **Technical Skills:** Python, SQL, Power BI, Tableau, Excel, Pandas, NumPy, Azure, Git, Jira

EXPERIENCE

Ontario Public Service - Supply Chain Policy and Oversight Division

January 2025 – April 2025

Data Research Analyst | Python, Pandas, NumPy, Power BI, Office Script, Git, Excel

Toronto, Canada

- Wrote clean, modular **Python code** to build **ETL pipelines** that cleaned and transformed **10 years of procurement data**, ensuring **code integrity** and maintainability.
- Developed and maintained **4+ interactive Power BI dashboards** using **DAX** and **star schema design** to visualize **supplier trends** and automate reporting for stakeholders.
- Designed **data validation checks**, **unit test cases**, and debugging workflows across **100K+ record datasets**, improving **workflow reliability** and reducing transformation errors.

Co-operators

September 2025 – December 2025

Agile Analyst / Product Manager | Jira, Excel, SQL, JavaScript, TypeScript, VS Code

Kitchener, Canada

- Analyzed **workflow and testing data** from a production **web application** to identify **recurring defects**, edge cases, and process inefficiencies prior to release.
- Collaborated with **stakeholders and developers** to refine **business requirements**, validate system behavior, and support **data-driven feature planning**.
- Created **Agile documentation**, tracking **metrics and test outcomes** in **Jira and Excel** to improve **reporting visibility** and deployment readiness.

Women in Math

January 2025 – April 2025

Data Scientist | R, SQL, Python, Tableau, Git

Waterloo, Canada

- Engineered a multi-source **data pipeline in R** to preprocess **500K+ hotel operational records**, integrating elevator logs, door access, and front desk systems for **unified analysis**.
- Resolved data quality issues such as **inconsistent time formats**, **missing entries**, and duplicate logs using advanced **imputation techniques (MICE, mean substitution)**, improving **data completeness by 25%**.
- Built **predictive models** using **random forest, regression, and LASSO** to identify **anomalous patterns and inefficiencies**, enabling operations to optimize staffing and reduce idle time by **12%**.

Deloitte

March 2023 – June 2023

Team Leader at Deloitte STEM Summit | Python, PyTorch, SQL, Tableau

Toronto, Canada

- Built a **machine learning blueprint** using **Python** and **PyTorch** that improved **operational efficiency by 30%**, reducing repetitive manual steps by **20%**.
- Utilized **SQL** to analyze and surface insights, streamlining processes and boosting **productivity by 30%**.

PROJECTS

EngageIQ : Best Visualization Overall at CxC Hackathon | Scikit Learn, Power BI, Azure

February 2025

- Analyzed **15K+ user events** on Federato's RiskOps platform, building **Power BI dashboards** and deploying models on **Azure** to surface engagement trends.
- Collaborated with stakeholders in an **Agile setting** to develop actionable insights and prototype retention workflows using **Power Apps**.

InvestorIntel - Winner CxC Hackathon | SQL, Python, Tableau, Power BI, Azure, Power Apps

February 2025

- Built a scalable analytics platform to analyze tech investment trends, integrating **Power BI, Azure Data Lake**, and **Power Apps** for stakeholder-ready dashboards.
- Led **Agile sprints** and cross-functional collaboration to modernize fragmented data workflows using **SQL** and cloud-based tools.
